

BAW50T24

Bentel

Power supply 24V, 1.8A

- Switching power supply/battery charger.
- Input voltage: 230V.
- Output voltage: 27.6V.
- Output current: 1.8A.
- Dimensions: 135x38x98mm.
- The power supply does not include a thermal probe.
- This accessory, included in the KST kit, allows the output voltage to be varied automatically based on the battery temperature in order to improve the charging process.
